

# Feature Overview

**Engineering**

**Insight**

**Expertise**

**Enablement**

## ● ENGINEERING

### Platform Access (Surveys + CRC)

- Access to core vulnerability assessment functionality. Including compliance surveys and our Cyber Risk Checkup scanning suite.

### Scanning + Phishing Subscription

- Access to our enhanced external and internal scanning suite. This also includes access to our social engineering campaigns feature that allows users to run simulated phishing campaigns.

### Insurance Renewal Report

- Access to our insurance renewal report that provides insights and action for organizations acquiring or renewing cybersecurity insurance.

### API Access

- The ability to interface with the Trava platform's external API. This allows for integrated and automated workflows with full programmatic access to the available features.

### Custom Reporting

- The ability to develop reports customized to an organization's compliance and cyber risk management needs.

## ● INSIGHT

### Risk Register

- A directory of identified risks & their impact/likelihood based on organizational practices.

### Mitigation Roadmap

- A roadmap of action items that can be taken to mitigate vulnerabilities and risks found from surveys and scans.

### Baseline Cyber Risk Assessment

- A comprehensive assessment that outlines an organization's cyber risk posture. This report aggregates vulnerability scan and security control implementations to create a detailed report of an organization's security program.

### Security Awareness Training Seats

- Licenses for a security awareness training platform. There, organizations are able to participate in and customize cybersecurity training and education.

## ● EXPERTISE

### Security Council Meetings

- Quarterly security council meetings to identify key objectives towards security and compliance goals, review progress towards project goals, identify roadblock and dependencies, align security programs with corporate initiatives.

### Incident Response Policy

- Develop a plan to respond to security incidents that may jeopardize security and ensure business continuity.

### Security Support Expertise

#### BASIC

In-product chat support & email support available between 9:00am - 5:00pm EST time with a Trava Security Specialist

#### ADVANCED

In-product chat, email, & scheduled phone/Zoom support available between 9:00am - 5:00pm EST with a Trava Security Specialist

## ● ENABLEMENT

### Onboarding and product facilitation

#### ON-DEMAND

Pre-recorded training video within the Trava platform

#### BASIC

Includes initial implementation, configuration, & one (1) live training session of the Trava platform & GRC platform purchased through Trava (as applicable). Includes access to on-demand training video.

#### ADVANCED

Includes initial implementation, configuration, & unlimited training sessions for Trava platform & GRC platform purchased through Trava (as applicable). Includes access to on-demand training video.
